Summary

Mobile Application Developer with nearly five years of experience developing enterprise Android, Flutter, iOS, and Kotlin Multiplatform applications. Experienced in building scalable cross-platform architectures, native Android applications using Jetpack Compose, native iOS applications using SwiftUI, and shared business logic using Kotlin Multiplatform. Strong expertise in Clean Architecture, MVVM, REST APIs, CI/CD automation, enterprise mobility, and end-to-end mobile application development.

Technical Skills

Languages: Kotlin, Dart, Swift, Java

Mobile: Kotlin Multiplatform, Android, Flutter, Jetpack Compose, SwiftUI

Architecture: MVVM, Clean Architecture, Modularization

Tools: Coroutines, Flow, Koin, REST APIs, Firebase, SQLite, GitHub Actions, Fastlane, Azure DevOps, Google Maps SDK, Zebra SDK, BLE

Experience

Würth IT India

Kotlin Multiplatform Mobile Developer

Apr 2025 – Present

Pune, India

- Delivered Product Search, Branch Search, Shopping Cart, Quick Scan, Delivery Address, Order Details, Authentication, CMS Pages, and Branch Opening Status features across Android and iOS using Kotlin Multiplatform.
- Developed shared business logic, networking, and repository layers using Kotlin Multiplatform, enabling maximum code reuse across Android and iOS.
- Built native Android (Jetpack Compose) and iOS (SwiftUI) interfaces while maintaining a shared Kotlin Multiplatform business layer.
- Implemented Google Maps-based Branch Search with location filtering, opening status, navigation, and branch discovery.
- Resolved production issues and improved application stability across Android and iOS releases.
- Automated Android and iOS deployment pipelines using GitHub Actions and Fastlane.

Accenture

Packaged App Development Analyst

Sep 2021 – Apr 2025

Pune, India

- Developed enterprise Flutter applications for Android and iOS supporting global retail operations with Zebra device integration, barcode scanning, inventory workflows, and offline synchronization.
- Designed reusable Flutter widgets and modular application architecture following MVVM and Clean Architecture principles.
- Integrated REST APIs, Firebase, and SQLite for authentication, offline storage, and real-time business workflows.
- Developed Zebra SDK integrations over Bluetooth and Wi-Fi for enterprise barcode scanning and inventory management.
- Optimized Flutter application performance through efficient rendering, state management, and API communication.
- Automated build and deployment pipelines using Azure DevOps.

Open Source

zebra_scan_print_datawedge

Enterprise Flutter plugin enabling Zebra DataWedge integration for barcode scanning and label printing.

pub.dev

smswatcher

Flutter plugin for monitoring incoming SMS using native Android APIs.
